

About Ravian Matrix Systems

Building IT, Web, and Geospatial Solutions from Munich

Ravian Matrix Systems is a Munich-based technical services business focused on web solutions, software development, geospatial intelligence, and digital growth.

We support businesses, startups, organizations, and project teams that need practical digital systems, structured development, spatial data solutions, and professional online presence.

You name IT, We make IT.

Who We Are

A Technical Service Partner for Digital and Spatial Solutions

We combine IT development, web systems, software solutions, geospatial capability, and digital communication under one structured service model.

Our work is built around clear requirements, practical delivery, and reliable communication. We help clients move from an idea, business need, or technical challenge to a working digital solution.

We are based in **Munich, Germany**, and support clients in **English and German**.

Our Foundation

Mission, Vision & Values

Our Mission

To deliver reliable IT, web, geospatial, and digital solutions that help businesses operate better, present themselves professionally, and make smarter use of data and technology.

Our Vision

To become a trusted technical service provider for businesses in Germany, Europe, and international markets by delivering structured, practical, and scalable digital solutions.

Our Values

We focus on clarity, reliability, practical execution, and professional communication. Every project should be useful, understandable, and aligned with the client's real requirements.

Our Team

Multidisciplinary Expertise

Our team brings together selected specialists across geospatial intelligence, software development, digital growth, and client communication.

Project communication, coordination, and delivery are managed through **Ravian Matrix Systems** in Munich to ensure clear responsibility, structured execution, and consistent quality.

Arslan Saleem

Founder & Geospatial Engineer

Arslan is the founder of Ravian Matrix Systems and is based in Munich. His background is in geospatial engineering, with a focus on GIS, remote sensing, spatial data, and technical project coordination.

Manisha Kumari

Client Relations & Business Development

Manisha leads client relations, business development, and sales communication. She holds an MBA in Sales and Marketing and focuses on client communication, requirement discussions, and business coordination.

Sidra Noor

Geospatial Intelligence Lead

Sidra leads geospatial and remote sensing work, with specialization in GIS, spatial data processing, mapping, environmental analysis, and remote sensing interpretation.

Waqas Mubarik

Digital Growth Lead

Waqas leads digital marketing, online visibility, SEO, content direction, and campaign support. His focus is on helping businesses improve their digital presence and brand communication.

Haseeb Raza

Web Development Lead

Haseeb holds a Bachelor's degree in Computer Science and leads web development work, with a focus on modern websites, web systems, responsive interfaces, and technical web implementation.

Qamar Raza

Application Development Lead

Qamar leads application development, with a focus on custom applications, backend systems, frontend systems, API integration, and digital platform development.

Project Coordination

Ravian Matrix Systems remains the central point of contact for each project. We manage requirement review, communication, coordination, quality control, and delivery through our Munich-based business structure.

Communication

English and German Support

We communicate with clients in **English and German**.

Initial inquiries are handled through the contact form or email. After reviewing the request, we can arrange a call, virtual meeting, or in-person discussion by appointment.

We respond within **24 hours on business days** with an initial reply or a non-binding quote where possible.

Why Work With Us

Practical, Flexible, and Requirement-Based

We do not force one fixed technology, template, or service model. Each project is reviewed based on its purpose, users, complexity, and long-term needs.

Our goal is to deliver digital and technical solutions that are structured, reliable, and useful in real business environments.

Final Call to Action

Let's Discuss Your Project

Tell us what you need, and we will help define the right solution.

We respond within **24 hours** with a **non-binding quote**.
